(Geography)(Chapter – 1) (Resources) (Class – VIII)

Exercises

Question 1:

Answer the following questions:

- (i). Why are resources distributed unequally over the earth?
(ii). What is resource conservation?
(iii). Why are human resources important?
(iv). What is sustainable development?

Answer 1:

- (i) The physical conditions of the climate are different in different part of the Earth. Due to this variation of terrain, climate, altitude, etc. the distribution of the resources is unequal.
(ii) Using the resources wisely and carefully so that it will be available for the coming generations is known as resource conservation.
(iii) Human resource (Human being as a resource) can utilise the natural resources in one of the best way to generate more resources applying their knowledge and technology.
(iv) Balancing the need to use resources wisely and also conserve them for the future is called sustainable development.

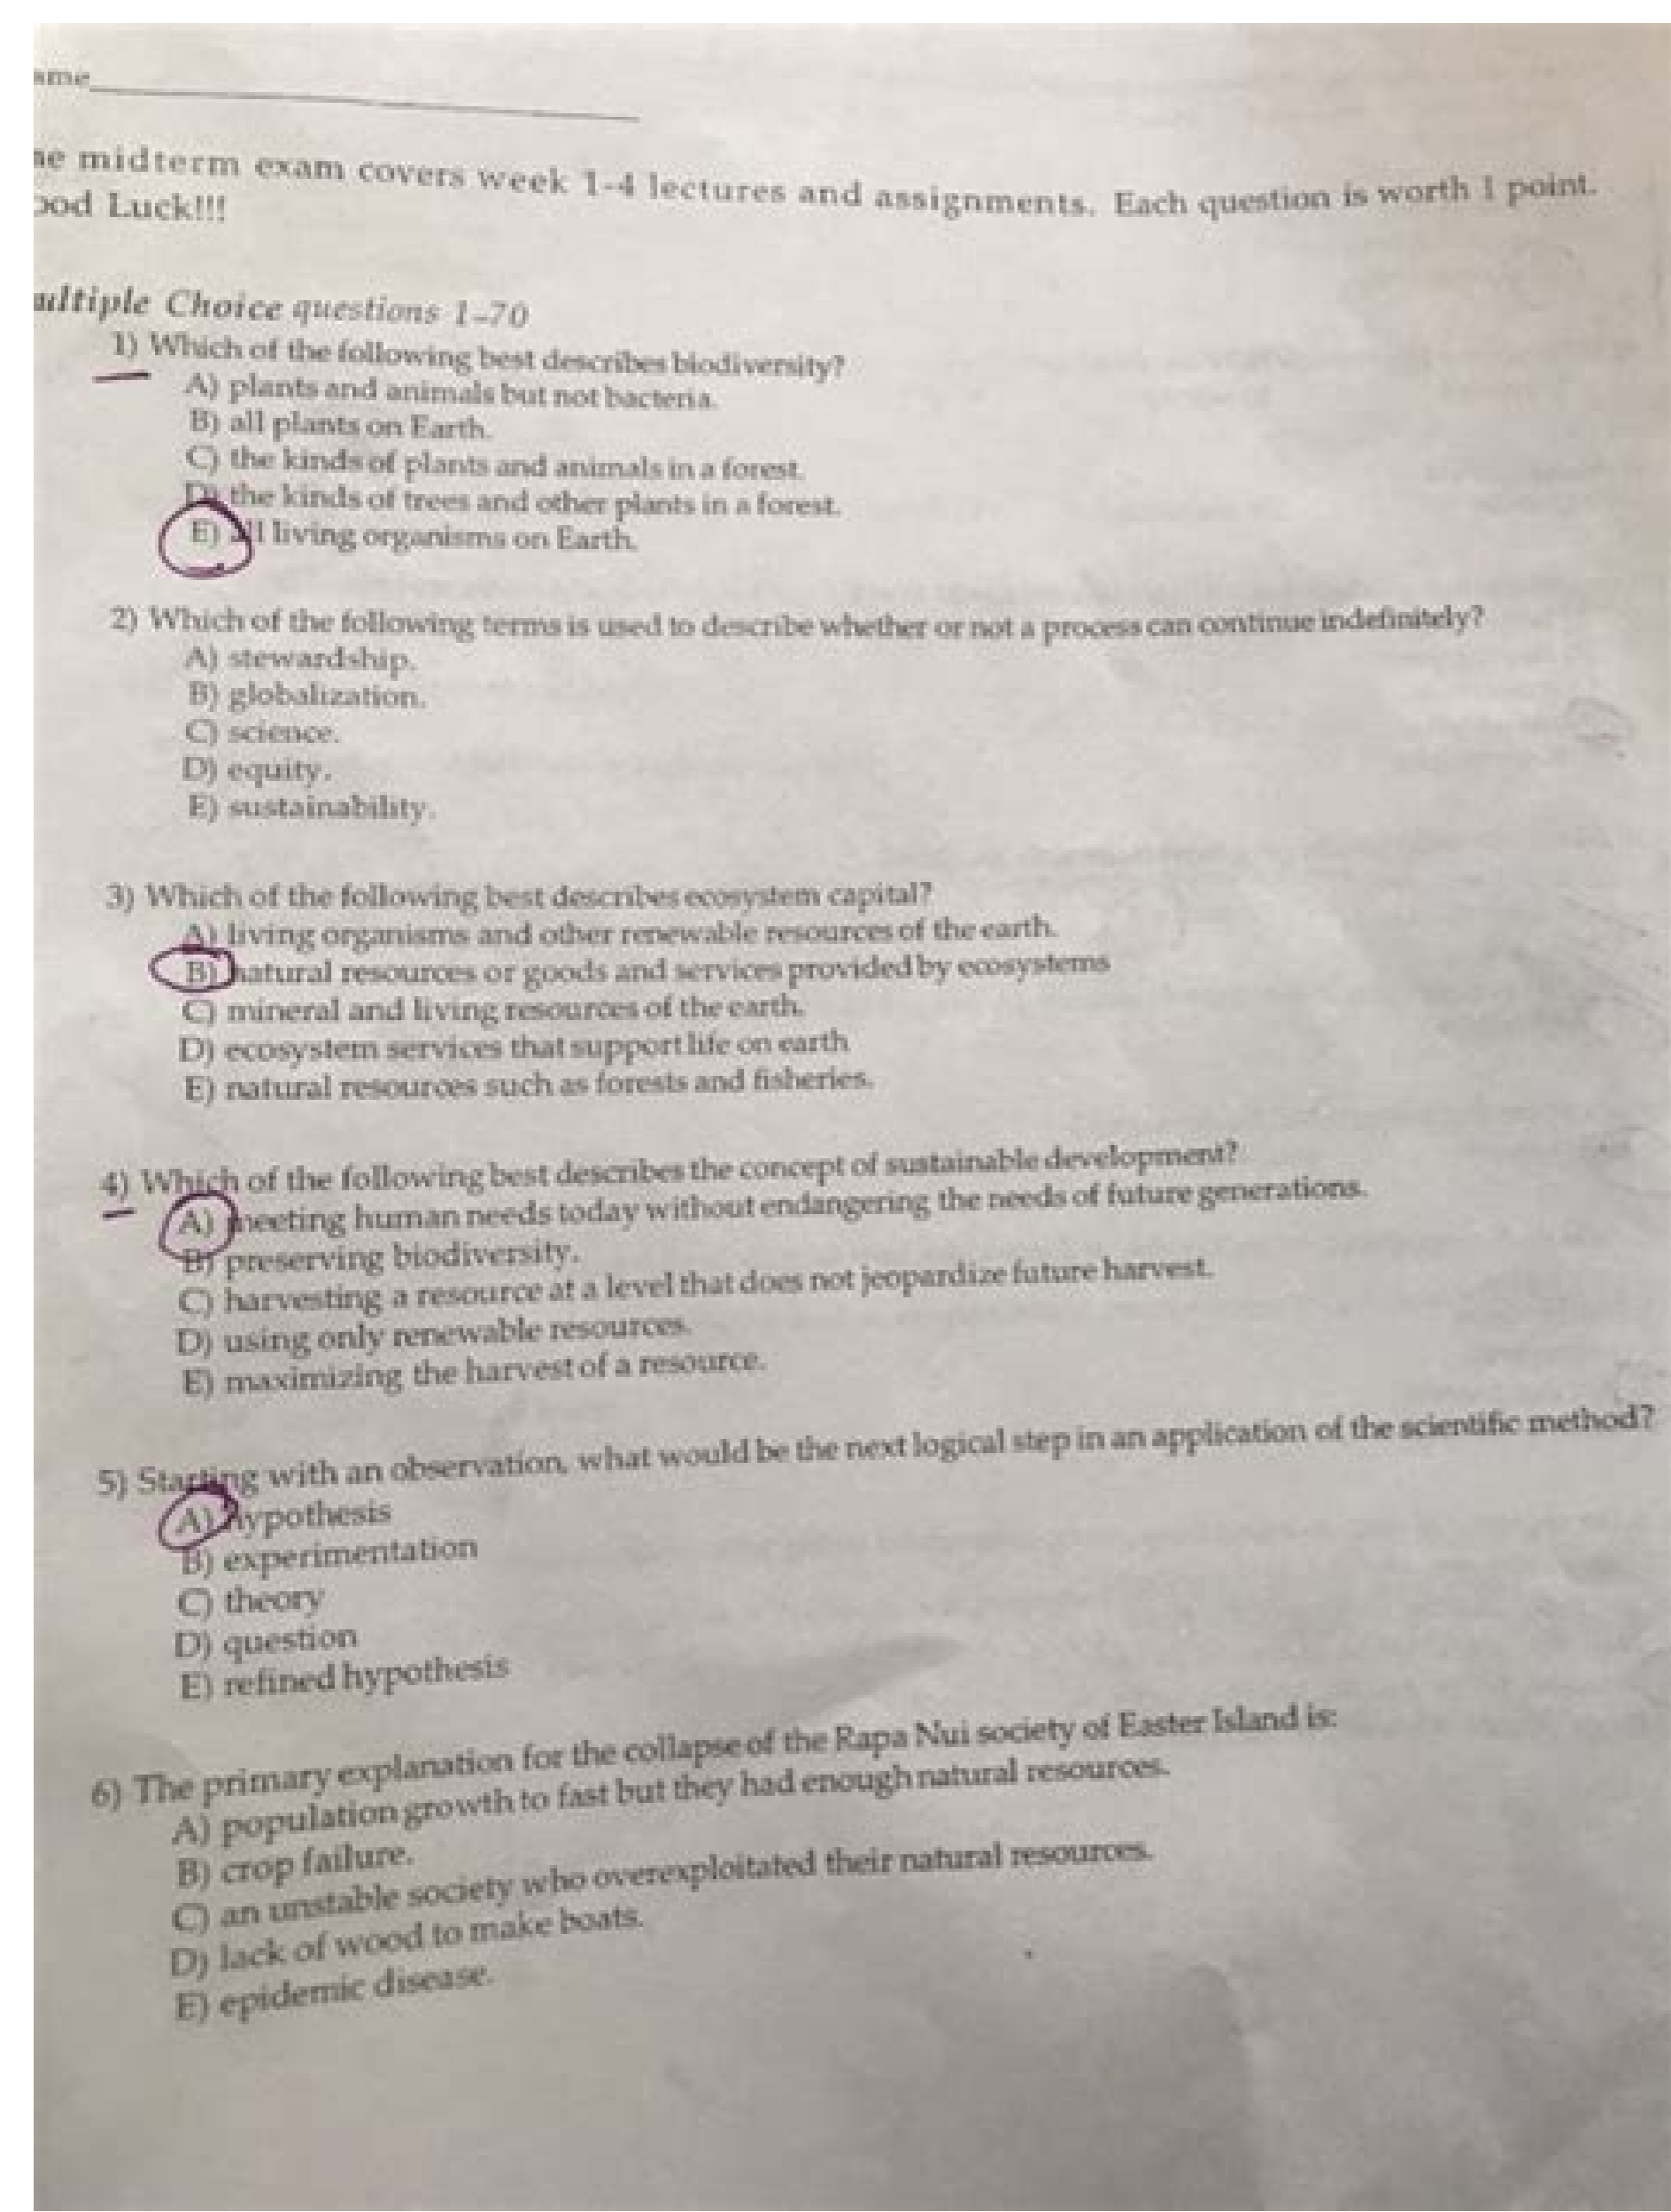

Question 2:

- (i) Which one of the following does NOT make substance a resource?
(a) utility (b) value (c) quantity
(ii) Which one of the following is a human made resource?
(a) medicines to treat cancer
(b) spring water
(c) tropical forests
(iii) Complete the statement.
Biotic resources are
(a) derived from living things
(b) made by human beings
(c) derived from non-living things

Worksheet titled 'Abliotic vs Biotic Factors' with a Venn diagram and multiple-choice questions about abiotic and biotic factors.

Worksheet titled 'Describe the difference between natural ecosystems and agriculture' with a detailed text explaining the differences between natural ecosystems and agriculture.

What is natural ecosystem give example. Which is not a natural ecosystem tick the correct answer. Which is not natural ecosystem. What are the natural ecosystem.

Living things interact with each other and also with non-living things like soil, water and air. A warning Report Error Page 2 Answer: (i) d, (ii) a, (iii) b, (iv) c. What is a natural ecosystem answer? India's #1 Learning Platform Start Complete Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,54,84,285+ Students Something went wrong. Which of the following is not a component of the environment? The physical environment consists of abiotic or non-living components such as land, air and water. Textbook solution See also why doesn't the ocean evaporate Tiger lives on land and it comes under the category of the terrestrial ecosystem. Experts estimate that these forests cover approximately one-third of Earth's surface. There, ecosystem services are grouped into four broad categories: provisioning, such as the production of food and water; regulating, such as the control of climate and disease; supporting, such as nutrient cycles and oxygen production; and cultural, such as spiritual and recreational benefits. Thus, it is not an example of an aquatic ecosystem. Ecosystems often contain many living things and can be as small as your backyard or as large as the ocean. Example - Lakes, Ponds, Terrestrial Ecosystem. A warning Report Error Page 3 Answer: (i) Man modifies his environment: Human needs are increasing day by day. Is a desert a natural ecosystem? Is not a member of aquatic ecosystem? Note: Air, water, soil, temperature, sunlight, minerals, gases, and chemicals, as well as some natural forces like weather and climate of an ecosystem, are the non-biotic components of the biosphere. For example, many bird species nest in one place and feed in a completely different area. Road (iv) b. What is an ecosystem Class 4? Which of the following is a natural ecosystem? An it is a geographic area where plants, animals and other organisms, as well as climate and landscape, work together to form a bubble of life. Artificial system includes man-made lakes, reservoirs, cities. Some ecosystems are very large. Which of the following options can be considered an ecosystem service? Earth (iii) c. The biosphere is not a component of the physical environment. An ecosystem is a community of living entities and not alive from a certain region, which is in constant interaction with each other, maintaining the ecological balance. There are many different ecosystems, including polar, forest, tundra and desert ecosystems. What is an ecosystem for class 8? Wait a moment and try again. Which of the following options are not a component of the biological environment? A natural ecosystem is a community of living entities and not alive and occurs freely by nature. SOCK: An ecosystem is a community of plants, animals and smaller organisms that live, feed, reproduce and interact in the same area or environment. Answer: (i) b. The natural ecosystem can be more classified in two aquatic systems. Answer: The earth is not life, so it is not a biological element. Ecosystems contain biotic or alive, parts, as well as abiotic factors or non-living parts. Algae are a group of non-flowering plants growing in stagnant water bodies and is part of the aquatic ecosystem. Ecosystems can be very large or very small. Which of the following options are not a biological element? An ecosystem is composed of all living and alive things that interact in a area. The community or group of living organisms living together and interacting with themselves in a specific environment is the ecosystem. Four types of ecosystem services to the evaluation of the million-meter ecosystem (MA), a great effort not sponsored to analyze the impact of human actions in and human well-being, identified four main categories of ecosystem services: provisioning, regulating, regulating, larutan a si dnoP :rewnsA .noitatipicorp fo tuoma wol ylemertxe na seviecer metsysoc treseD AT A ç .smsinagroorcim dna slamine ,stnalp ,retaw ,ria ,thgilnus ,lios era snoitcaretni eseht tuoba gnirb taht smetsysoc larutan fo stnenopmoc ehT AAç erehpsordyh dna erehpsomtil ,erehpsohpshpsht dellac era eseht ,slamina dna stnalp fo sdnik tnerelfid ot emoh era smetsysoc tnerelfid .tserof - elpmaxE smetsysoc tserof fo sepyt 3 ehT era tahW smetsysoc tserof fo sepyt 3 ehT era tahW .tmemnorivne rieht dna smsinagro gnitcaretni fo ytinummoc a si smetsysoc nA çYsaE edam sdik F smetsysoc E smetsysocE nA si tahW zdik oobakeeP | sdik rof soediv gniaræl tseb | wols sconB rD ehT AAç METSYSOCE .metsysoc citauga dna lairtsret ehT otni deifissalc rehruf si smetsysoc larutan ehT .noitalupop gniworg OAF syroetae ni selictra erom eeS smetsysoc niatnummo stisnoc smetsysocemetsysoc na si tahWsmetsysoc larutan a si hcihwtnemnorivne ot taerht taerht a si hcihwtnemnorivne namuh fo tnenopmoc a ton si hhw !!woN gniyuB m A | ygoloiB | tmemnorivne dna ygolocE | smreT ygolocE yeK .tmemnorivne cificeps a ni rehto hcae htiw tcaretni dna ni evil taht smsinagro gniwil fo puorg ro ytinummoc a si ti ti taht si smetsysoc na fo noitnifed tselpmis ehT .tressed dna sdnaissarg ,tserof sedulcni smetsysoc lairtsret ehT ?rewns 9 ssalC smetsysoc si tahW .metsysoc larutaN laisoce fitra strap owt otni deifissalc era smetsysocE ehT .laerob dna ,laciport ,etarepmet .tsixe taht tserof fo sepyt lareneg eerht era ereht .a jii (muirauq ?rewns trohs smetsysoc si tahW .metsysocE Alarutan a ton si smuirauqA .smuirauqAA .e.i 2 noitpo si rewnsA tcerroC ehT sni M 021 skraM 004 snoitseuQ 001 eerF rorrE tropeR gniaraw A sdeen rieht have of rehto hcae no dneped slamine dna stnalP rehto hcae no dneped slamina dna stnalP)ii (?trohs smetsysoc si tahW .sdeen ruo lliluf ot tmemnorivne ruo gnyifidom era ew erofeht si ti .secippres gnitrovres gnitroi us dna
